

ShrinkCrete

Shrinkage Reducer & Crack Control Admixture

ShrinkCrete is a specially formulated powder admixture to reduce shrinkage, cracking, and curling.

Advantages

- ShrinkCrete can be added to the mix as a powder, just like cement or Micro fines / Pozzolanic materials.
- ShrinkCrete should be added to the mix before other admixtures or water, minimum 60 seconds of mixing time is required for even distribution of the product in the mix.
- ShrinkCrete is not designed to compensate for improper or inappropriate curing procedure. Appropriate curing procedures have to be followed while placing the concrete.

Storage

Store in dry cool area free of moisture. Shelf life is at least 18 months

Properties

| Colour | Off-white |
|--------------------------|---------------------|
| Appearance | Free-flowing powder |
| Specific Gravity (20o C) | 2.9 |
| pH (10%) | 10-11 |

Usage Instructions

Recommended dosage rate for ShrinkCrete is 5% of cement content or 5 kg for 100 kg cement in concrete. ShrinkCrete when used at 5% dosage level shows shrinkage control and reduced cracking as high as 90%.
